Work Performed under NASA Contract
NSR-09-010-027

September 1970
PREFACE

This bibliography lists publications of the NASA Planetary Quarantine Program under funded contracts and grants issued during the calendar year of 1969. The compilation follows the policy established for the previous issue by including certain non-NASA funded, but Planetary Quarantine oriented items.

The bibliography is designated The 1969 Supplement, which corrects a technical inaccuracy of past years where each annual publication was designated as an edition. The 19 November 1968 and November 1969 "editions" are in fact supplements to the basic document of 26 June 1967.
FOREWORD

Many of the documents cited in this supplement are augmented by the distributing facility designation number which is enclosed by brackets. This is done to aid the user of the supplement in obtaining a hard copy or microfiche of the referenced item. The cross hatch symbol, #, used in conjunction with the accession number indicates the item is available in microfiche as well as in hard copy.

Items with numerals preceded by only the letter "A" may be procured from the

Technical Information Service
American Institute of Aeronautics and Astronautics, Inc.
750 Third Avenue
New York, N.Y. 10017

References preceded by the letter "X" are usually limited in their distribution to NASA associated personnel. All other items are obtainable from the

Clearinghouse for Federal and Scientific Information (CFSTI)
U.S. Department of Commerce
5285 Port Royal Road
Springfield, Va. 22151

NASA contractors, grantees, and consultants may obtain many of the documents through their librarians from the

NASA Scientific and Technical Information Facility
P.O. Box 33
College Park, Md. 20740

Systematic description and key to streptomyces isolants fro 73

VIKING

Investigation of methods for the sterilization of potting co 306
(mission) Planetary quarantine program/ 268
Space programs summary no. 37-60, Vol. 1. Flight projects/ 174
voyage to Mars/1973 325

VIRAL

aerosols and bacterial aerosols/Evaluation of air filters 151

VIRUS

aerosols/Method for determining virus on surfaces contaminat 177
on surfaces contaminated by them with aerosol method/Experim 27
in foods for spaceflights/Stability of 107
in liquids/Detection of bacteria and 208

VOYAGER

Interplanetary spacecraft decontamination operations and equ 8

WATER

1973 Viking voyage to Mars/ 325
activity: use of membrane filter support for test organisms 4
Apollo lunar module engine exhaust products/ 282
by bacterial spores and its relation to dry heat resistance 260
(content) Bacterial response to soil environment/ 77
(content) Environmental microbiology as related to planetary 74
(content) Investigations into a diffusion model of dry heat 65
cryotheilist's conjecture of planetary life/ 270
Dry heat destruction rates for microorganisms on open surfac 232
Ecology and thermal inactivation of microbes in and on inter 243
Ecology and thermal inactivation of microbes in and on inter 244
Ecology and thermal inactivation of microbes in and on inter 245
Ethylene oxide sterilization, current review of principles 178
Frontiers in solar system exobiology/ 264
Ice caps on Venus/ 35
Investigation of methods for sterilization of potting compou 307
Microbiology studies/ 165
Resistance of organisms to extreme influences in relation to 38
Soil moisture, relative humidity, and microbial abundance in 96
Television observations from Mariner 6 and 7/ 185
vapor in its atmosphere/Mars 223
wide angle gas bearing gyro FCC3345/Sterilizable 88
JOURNALS PUBLISHING

PLANETARY QUARANTINE RELATED ARTICLES

Below is an alphabetical list of journals in which articles germane to the Planetary Quarantine Program of NASA's Bioscience Programs have been published. The number of related articles which appeared in each journal is indicated parenthetically.
