Work Performed under NASA Contract
NSR-09-010-027

August 1971
PREFACE

This compilation is the fourth annual supplement to the original bibliography issued in June, 1967, entitled Scientific Publications of the Biosciences Programs Division, National Aeronautics and Space Administration, Volume V. Planetary Quarantine.

The annual supplements consist of citations of documents relating to planetary quarantine; many, but not all, refer to work supported by the Planetary Quarantine Office, Planetary Programs, National Aeronautics and Space Administration, Washington, D.C. While they are compiled primarily to bring up to date our survey of the literature in the field, it will be noted that there is also a heavy back gathering of references not previously included. Some of these ante-date the formation of NASA, but are of substantive or historical value to the planetary quarantine program.

In certain references, numerals preceded by the letter A, AD, N, X, NASA-CR, NASA-SP, or NASA-TM-X are given parenthetically as part of the citation. These numbers will implement the procurement of the document. Those carrying "A" numbers are obtainable, for a fee, from the American Institute of Aeronautics and Astronautics, Inc. Technical Information Service 750 Third Avenue New York, New York 10017

"X" numbered documents are limited in their distribution to NASA associated or contractor personnel. "AD" coded documents are generally available from the Defense Documentation Center Cameron Station Alexandria, Virginia 22314

The authors wish to acknowledge with gratitude the able and tireless assistance of Miss Susan E. Dugan in the preparation of this bibliography.

CITATIONS

1939

1945

1949

1951

1954

1957

1958

1959

1961

44. HAWRYLEWICZ, E.J. and R. Ehrlich. Studies with microorganisms and plants under simulated Martian environments. Presented at the Symposium on extraterrestrial biochemistry and biology, 128th meeting of the American Association for the Advancement of Science, Denver, December 1961.

1962

56. GAMBILL, V.M. Bacterial penetration of the millipore microtube cartridge filter. U.S. Army, Fort Detrick. 8 October 1962.

1963

75. NORTH AMERICAN AVIATION, INCORPORATED. Ultrasonic cleaning: A bibliography. SID-63-167. 1 March 1963. (N63-23353)

77. PORTNER, D.M. Microbial contamination obtained on surfaces exposed to room air or touched by the human hand. U.S. Army, Fort Detrick Protection Branch Report of Test No. 1-64. 22 July 1963.

87. YALOF, S. Compatibility of Centaur/Surveyor materials with Freon-12 ethylene oxide sterilant gases. 4th quarterly report. MGG-299. General Dynamics Astronautics. 27 May 1963. (AD 405 179)

1964

1965

120. COMMUNICABLE DISEASE CENTER. Services provided in support of the planetary quarantine requirements of NASA. Reduction of bacterial dissemination; germicidal activity of ethylene oxide; reduction of bacterial contamination on surfaces. 5th quarterly report. Department of Health, Education and Welfare, Public Health Service, Atlanta. 12 November 1965.

133. HALL, L.B. Spacecraft sterilization - A new engineering and sanitation technology. Presented at the annual meeting of the American Public Health Association, Chicago, October 1965.

134. HALL, L.B. Spacecraft sterilization and the prevention of planetary contamination. Presented at the 65th annual meeting of the American Society for Microbiology, Atlantic City, April 1965.

1966

174. BOLLEN, W.B. Systematic description of bacterial isolants from rigorous environments. Prepared for Jet Propulsion Laboratory by Oregon State University. 1 April 1966.

-17-

182. CORNELL, R.G. A nomenclature of symbols relevant to the probability of contaminating Mars. TR 5. Florida State University, Department of Statistics. 24 August 1966. (NASA-CR-77753)

183. CORNELL, R.G. Sterilization requirements. TR 1. Florida State University, Department of Statistics. 14 February 1966. (NASA-CR-704790)

184. COSPAR CONSULTATIVE GROUP, CHAIRMAN. Potentially harmful effects of space experiments. In: Minutes of the meeting of the Executive Committee on Space Research at the 9th meeting of COSPAR, Vienna, May 1966.

188. FARMER, F.H. Microbiological contamination control in spacecraft sterilization. Presented at the Sterilization Technology Symposium at the 13th annual technical meeting of the Institute of Environmental Sciences, San Diego, April 1966.

205. MAGISTRALE, V.J. Engineering problems in capsule sterilization. Astronautics and Aeronautics 4:80-84; February 1966. (A66-20249)

229. STEVENS, J. Environmental specification Voyager capsule flight equipment type approval and flight acceptance test procedures for the heat sterilization and ethylene oxide decontamination environments. VOL-50503-ETS. Jet Propulsion Laboratory. 12 January 1966.

AUSTIN, P.R. Spacecraft preparation and sterilization as state of the art. Contamination Control 6:32,34,35. August 1967. (A67-36804)

BOTAN, E.A. and T.H. Rider. Experimental Assembly and Sterilization Lab (EASL) microbiological assay and certification of spacecraft hardware sterility. EASL 300.01 (Supersedes EASL 300.00) AVSSD-0134-67-CR Prepared for Jet Propulsion Laboratory by Avco Corporation. 15 April 1967. (N68-22635)

268. NATIONAL COMMUNICABLE DISEASE CENTER. Services provided in support of the planetary quarantine requirements of NASA. Reduction of microbial dissemination; germicidal activity of ethylene oxide; reduction of microbial contamination on surfaces. Evaluation of leakage of microbial contamination from Gemini space suits. 8th quarterly report. Department of Health, Education and Welfare, Public Health Service, Atlanta. 8 April 1967.

1968

1969

NATIONAL COMMUNICABLE DISEASE CENTER. Services provided in support of
the planetary quarantine requirements of NASA; germicidal
activity of ethylene oxide; reduction of microbial dissemination.
11th summary report of progress. Department of Health,
January 1969.

NELSON, B.A. Mathematical models for contamination and pollution
prediction. Presented at the 15th annual technical meeting of
the Institute of Environmental Sciences, Anaheim, Cal., April 1969.

Below is an alphabetical list of proceedings in which papers germane to planetary quarantine have appeared. The number of papers from each meeting cited in this bibliography is indicated parenthetically.

American Association for Contamination Control, Eighth Annual Technical Meeting and Exhibit, New York, May 1969. (2)

American Association for the Advancement of Science, Symposium on Extraterrestrial Biochemistry and Biology, Denver, 1961. (1)

American Astronautics Society, Symposium, Denver, February 1965. (1)

American Institute of Aeronautics and Astronautics, Meeting on Unmanned Spacecraft, Los Angeles, March 1965. (2)

American Institute of Aeronautics and Astronautics, Third Thermophysics Conference, Los Angeles, 1968. (1)

American Public Health Association, Annual Meeting, Chicago, October 1965. (1)

American Society for Microbiology, 65th Annual Meeting, Atlantic City, April 1965. (1)

European Contamination Control Symposium, First, Stuttgart, June 1970. (1)

IAS/NASA, National Meeting on Manned Space Flight, St. Louis, 1962. (1)

Institute of Environmental Sciences, 12th Annual Technical Meeting, Sterilization Technology Symposium, San Diego, April 1966. (3)

Institute of Environmental Sciences, 14th Annual Technical Meeting, St. Louis, April, 1968. (1)

Institute of Environmental Sciences, 15th Annual Technical Meeting, Anaheim, California, April 1969. (1)
Instrument Society of America, Annual Conference, Houston, Texas, October 1969.  (3)

International Congress for Microbiology, 10th, Mexico City, August, 1970.  (1)

International Federation of Automatic Control, Third Symposium on Automatic Control, Toulouse, France, March 1970.  (1)

Jet Propulsion Laboratory and Lockheed Missile and Space Company, Proceedings of the First Symposium on Aerospace Mechanisms, Santa Clara, California, May 1966.  (1)

NASA, Semiannual Spacecraft Sterilization Technology Seminar, Atlanta, April, 1970.  (6)

NASA, Spacecraft Sterilization Technology Seminar, Cape Kennedy, Florida, February 1969.  (1)

NASA/University of Virginia, Biospace Technology Training Program, Wallops Island, Virginia, August 1966.  (1)

Symposium on Surface Contamination, Gatlinburg, Tennessee, June 1964.

U.S. Department of Agriculture, 10th Biological Safety Conference, Plum Island Animal Disease Laboratory, Greenport, Long Island, September 1965.
CORPORATE SOURCES

Below is an alphabetical address list of NASA centers, NASA contractors, and other sources of the material cited in this bibliography.

Aerospace Technology Division
Library of Congress
1st St. between East Capitol St. and Independence Ave, S.E.
Washington, D.C. 20540

American Association for Contamination Control
6 Beacon Street
Boston, Massachusetts 02108

Avco Corporation
Lowell Industrial Park
Lowell, Massachusetts 01851

Battelle Memorial Institute
505 King Avenue
Columbus, Ohio 43201

Becton Dickinson Research Center
P.O. Box #11276
Raleigh, North Carolina 27604

Bell Aerospace Company
Textron Inc.
Sunnyvale, California 94088

Biological Sciences Communication Project
The Medical Center
The George Washington University
2001 S Street, N.W.
Washington, D.C. 20009

The Bionetics Corporation
3221 North Armistead Avenue
Hampton, Virginia 23366

Boeing Company, Aerospace Group
P.O. Box #3999
Seattle, Washington 98124

Brooks Air Force Base
San Antonio, Texas 78235
Center for Disease Control
Phoenix Laboratories
4402 North Seventh Street
